SEARCH NOTES (INCLUDING SEARCH STRATEGY)		
	DATE	EXMR
Consulted Chris Grant, Vivek Srinvastava, Hunter Lonsberry, Scott Belevue, Andrew Koenig and Hai Tran in class 725	12/22/2005	
The examiner consulted various examiners concerning the amended negative claim limitaitons in the independent claims.		
Two opinons were presented from the consultations, the amended limitations does not limit the scope of the claim and		
the limitations have weight, but is inherent to the '562 patent claims used to provide the double patenting rejection		
as well as the limitations being broad to still read on Lawler. The examiner searched and found a better piece of art and		
applied Matthews to the claims and stated both views in the rejections in view of the differing opinions.
